

¿Puedo escribir mis propios mensajes de correo electrónico?

La plataforma Credly permite personalizar varios campos de texto sin costo alguno. Espere una semana desde el momento en que su equipo apruebe el plan de diseño para su implementación.

Credly's Acclaim platform offers the following options for customization:

1. Write your own custom subject line
2. Customize the sender domain so that emails appear to come from your organization*
3. Customize the header in the email
4. Add an additional brief statement about your badge offering before or after the call to action

*This requires development work on your end. We will provide the required steps upon request.

The screenshot shows an email interface with the following elements:

- 1**: Points to the subject line: "Ryan Technologies issued you a new badge"
- 2**: Points to the sender information: "Acclaim (no-reply)@credly.com" and "Ryan Technologies"
- 3**: Points to the header area: "You've earned a badge from Ryan Technologies"
- 4**: Points to the main body text: "Cloud Tech 10 issued by Ryan Technologies" and "Accept your badge"

At the bottom of the email, there is a link: "or accept your badge by clicking: <https://credly.com/demo/youracclaim.com/guest/credly/credly/credly>"
